Genere le 16/06/2026 08:30

Demande

Numero de demande: 3DP-2026-0033

Titre: Prototype Housing for IoT Monitoring Device

Statut: requester_confirmation

Priorite: normal

Site: SAME

Cree le: 12/06/2026 10:40

Informations du requester

Nom: Demo Requester

Email: requester@avocarbon.com

Departement: Production

Reference projet: IOT-MONITOR-V2

Reference client: RND-2026-008

Description

Purpose: Produce a prototype enclosure for a new IoT monitoring device to validate assembly, ergonomics, and internal component fit before mass production.

Description piece: Two-piece enclosure consisting of a top cover and bottom housing with screw mounting points, ventilation slots, cable entry openings, and space for a PCB and battery pack.

Quantite: 1

Categorie: Prototype

Criticite: normal

Environnement utilisation: Indoor office and laboratory testing environment.

Exigences fonctionnelles: Must allow assembly testing, PCB installation, battery placement, and connector accessibility.

Exigences visuelles: Smooth appearance suitable for customer demonstration. Minimal visible layer lines.

Donnees techniques

Dimensions: 180 mm x 120 mm x 45 mm

Echelle: 1:1

Tolerance: ?0.15 mm

Finition surface: Sanded and painted

Resistance demandee: Light-duty prototype

Couleur souhaitee: White

Matiere souhaitee: PLA

Infill: 15%

Hauteur couche: 0.15 mm

Orientation: Bottom housing flat on bed

Planning

Date souhaitee: 19/06/2026 00:00

Date approuvee: 18/06/2026 00:00

Debut planifie: 15/06/2026 00:00

Fin planifiee: 16/06/2026 00:00

Imprimante: Printer-02

Matiere: PLA Black

Technician: Tech Operator

Raison priorite: Prototype required for internal design review and customer presentation before final tooling approval.
